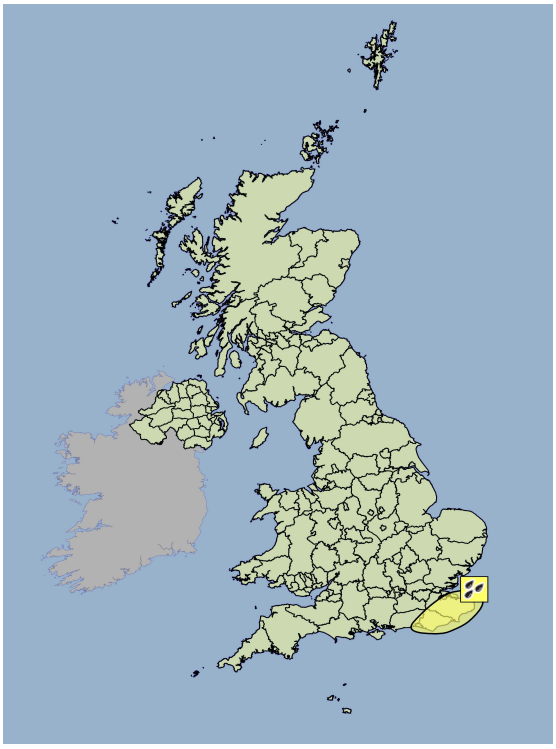
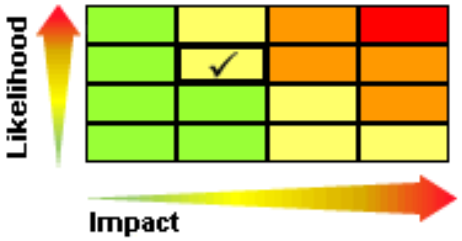
National Severe Weather Warning Service





Chief Forecasters Assessment
A weakening cold front will become slow moving over the far southeast of England for a time this afternoon, when it is likely to become the focus for the development of slow moving heavy showers and possible thunderstorms. As is the case with showers, some places will miss them altogether, but where they do occur, there is a risk of 20-30 mm of rain falling in less than 2 hours.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **12:00 on Sun, 27th Jul 2014** until **18:00 on Sun, 27th Jul 2014**

Heavy showers and isolated thunderstorms are likely to develop across the far southeast of England this afternoon.

The public should be aware that localised surface water flooding is possible.
